

ADD/ADHD Treatment Contract

You, or your minor child, have been diagnosed by a McKinney Family Medicine (MFM) health care practitioner as having Attention Deficit Disorder (ADD) or Attention Deficit Hyperactivity Disorder (ADHD). Medications used for the treatment of ADD/ADHD are controlled substances, the prescription of which is tightly controlled by state/federal law. Treatment of ADD/ADHD will be according to the following guidelines:

1. After initiation of treatment, a follow-up visit, for any reason, is required every 3 months, at minimum, prior to the issuance of refills of medication prescribed for the treatment of ADD/ADHD. There will be no exceptions to this rule. Merely scheduling a follow-up appointment does not satisfy this requirement.
2. Medication prescriptions cannot be mailed, faxed or called into the pharmacy. The prescription must be picked up at MFM by the patient or another person for whom written consent is on file. Medication prescriptions will remain valid for 21 days, and cannot be filled after that time. Requests for medication refills may be submitted when the patient has 7 or less days of medication remaining. Please allow at least 2 business days for the prescription to be written and ready for pick up.
3. You are advised to promptly contact MFM if you or your minor child encounters any potential adverse side effects from the prescribed medications.
4. Any suspected inappropriate use/abuse of prescribed medications by your minor child is to be promptly reported to MFM.
5. Any requests for changes in prescribed medication will require a follow-up visit to determine the appropriateness of medication changes and to issue any new prescriptions.
6. MFM is to be promptly notified in the event that the medication prescription or prescribed medication is lost, stolen or rendered unusable. Such an occurrence will be thoroughly evaluated by the physician prior to the issuance of a replacement prescription.
7. If your health insurance does not cover the cost of mental health services, including treatment of ADD/ADHD, the patient/parent will be responsible for the full cost treatment.

Brian C. Procter, M.D.

I have read the above ADD/ADHD treatment guidelines. I understand that failure to follow the above guidelines may result in refusal of further treatment of me or my minor child for ADD/ADHD by McKinney Family Medicine.
